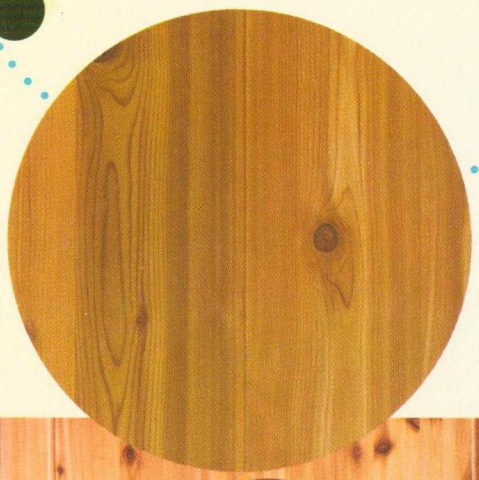
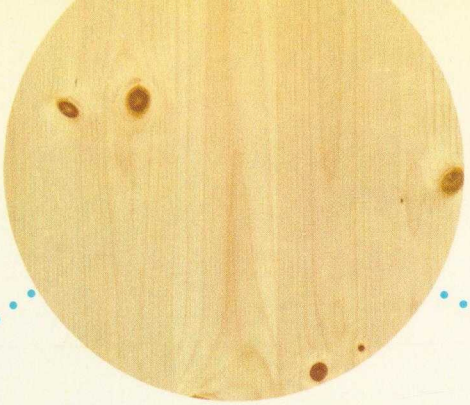
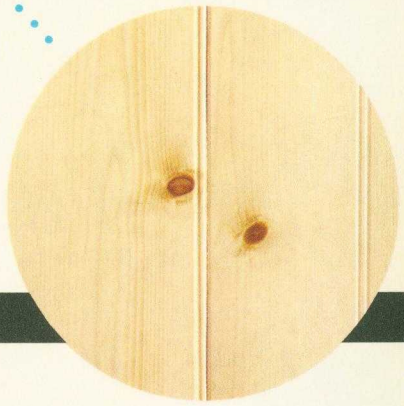
Knotty Inland Red Cedar plywood is shown here in its natural color. Note the rich grain and interesting color contrasts. Panels may be finished clear, stained or in a variety of color effects.





Knotty Idaho White Pine plywood is pictured before any special finish or stain is added. Scattering of knots gives this wood a special charm, making it a traditional American favorite.

Gruve-Ply is a new paneling material available in Knotty Pine and Knotty Cedar. Ingenious vertical grooving provides a blended joint treatment of adjoining panels, and creates a pattern of individual boards. The ease and economy of plywood installation is retained.



Here is Lasting Warmth and Beauty in a selection of

Plywood Panelings

Here is an entire room paneled in Knotty Cedar Plywood. Knotty Cedar tones range from golden browns to beautiful honey shades, giving any room new excitement and beauty.

Beautiful plywood panelings retain all the distinctive beauty of wood paneling, and give you the advantages of speed and economy in installation. The large panels go into place easily and quickly, with a minimum of sawing and fitting.

Decorative plywood paneling can be finished to meet any personal preference. Many prefer to use clear finishes which retain exactly the distinctive natural color of the wood used. Others prefer light stains, often called "natural finishes", which tone the wood yet preserve the beautiful grain. And, of course, wood paneling can be painted to match any decor.

However you finish it, wood paneling always is in good taste in any room of your home. Ask your Weyerhaeuser 4-Square Lumber Dealer to show you his wide selection of beautiful and enduring plywood panelings. See for yourself how much they can add to your home and your joy of living.
